## Novell Product Announcement

Number: 7691

Span of Distribution: VLA, MLA

Confidential Until: Not Applicable

### Bundle Commander 1.2

Bundle Commander is an offering by ROVABU Software BV, which offers system and desktop administrators advanced tools for the deployment of Windows applications with Novell ZENworks Configuration Management. This tool shortens the necessary deployment time by more than 90 percent.

Bundle Commander Standard Edition offers the following features:

- Creating Install & Launch bundles in Novell ZENworks Configuration Management for Windows applications
- Configuration wizards for Novell GroupWise, Novell Filr and Novell Vibe Desktop
- Generic MSI Import Wizard to import multiple MSI packages in one process
- Provides unattended/ silent switches for Novell legacy setups
- Integration with ITNinja, a community for IT professionals focused on Windows application deployment

With Bundle Commander, system or desktop Administrators can use intuitive wizards to create Windows bundles in ZENworks Configuration Management. This can significantly decrease the time spent by Administrators. This automated deployment method also increase consistency. Bundle Commander is available for download as part of ZENworks Configuration Management Editions & Endpoint Management Suites.

This Product Announcement applies to the Novell Corporate Price List.
